

TECHNICAL BULLETIN – CLEANING OF DISINFECTANT WIPE CHARGING BUCKETS

Rev July 21, 2020

Diversey offers many cleaners and disinfectants in, dilutable and ready-to-use formats. Some users choose to prewet disposable wipes in reusable charging buckets for wipes on demand.

Diversey encourages you to ensure wipes and chemicals are compatible and proper instructions for use are shared with the staff prior to use.

It is recommended to rinse, clean and dry any reusable charging buckets between uses.

For users of these products, it is recommended to use the same product in a bucket for repeated use. After emptying it is recommended to clean and disinfect both the bucket and lid, rinse, and dry thoroughly prior to reuse.

We recommend the following steps:

1. Remove the lid and empty the bucket and clear of all residual liquids.
2. Rinse bucket and wipe lid with disinfectant and let remain in the bucket and on the lid for the dwell time on the product.
3. Rinse with warm water.
4. Wipe the outside of the bottle with disinfectant, as well as the top of the lid.
5. Allow to air dry prior to refilling.

If there are any questions about this assessment or any Diversey products, please contact Diversey Customer Technical Support at 1-800-558-2332, option 5.
